## **Introduction to the Collection**

This is the Administrative Record file for the Aerovox removal site, New Bedford, MA, Removal Action. This Administrative Record was established in July 2004 and subsequently released on CD-ROM in March 2009. The file contains site-specific documents and a list of guidance documents used by EPA staff in selecting a removal action at the site.

Activities undertaken during the removal action will protect public health, welfare and the environment, and involve removing a source of potential contamination. Removal activities include collecting samples from the drums, containers, vats and tanks for waste characterization; repackaging hazardous wastes as necessary; removing drums and cylinders from the facility; and disposing of hazardous substances at approved off-site disposal facilities. In addition, removal activities include repairing the asphalt cap located at the rear of the facility. Additionally, polychlorinated biphenyl (PCB) contamination within the impregnation tank room will be addressed if PCB concentrations meet removal criteria.

The Administrative Record is available for review at:
